

Comprehensive Load Cell Testing Solutions

J.A. KING
& COMPANY, LLC

Servicing Load Cells of any Form

Up to 100,000 lbs of accredited capacity

For more than 70 years J.A. King & Company has served the measurement industry, continuing to offer the highest quality services available to our customers across the Southeast.

With our new ISO 17025 A2LA accredited load cell testing system, J.A. King & Company is more equipped than ever before to serve the needs of the measurement industry.

With improved accuracy, enhanced capacity, and substantially improved NIST tracability, we are now better equipped than ever before to handle your Load Cell service, repair, and calibration needs.

Contact your local J.A. King Application Engineer today and find out how you these changes can benefit your bottom line.

Superior Repeatability. Expert Accurarcy.

» 100,000 LBS Capacity

With our fully accredited expanded scope of capabilities, J.A. King & Company is now equipped better than ever for all of your force, tension, and compression testing needs.

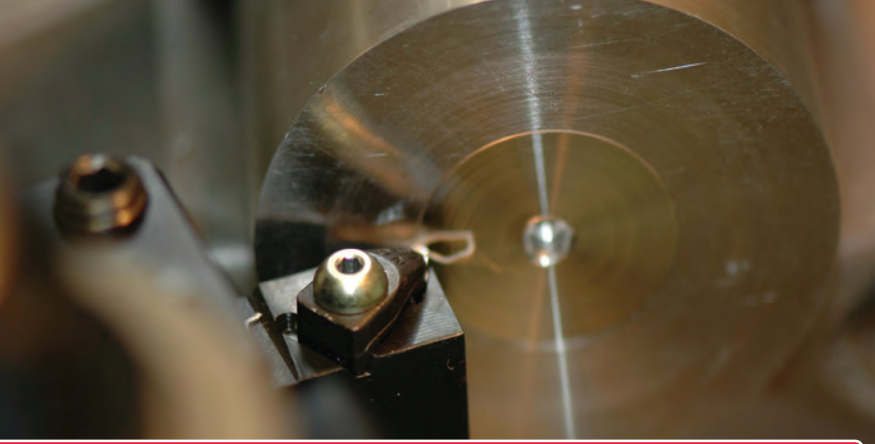

» State-of-the-Art Precision

With the finest accuracy and repeatability available in the region, J.A. King & Company continues to offer the most advanced measurement services available to our thousands of satisfied customers.

» Greatly Improved NIST tracability

Our new system brings us closer to the National Institute of Standards and Technology than ever before. Our standards just one step away from NIST itself, making our system one of the most accurate in the region.

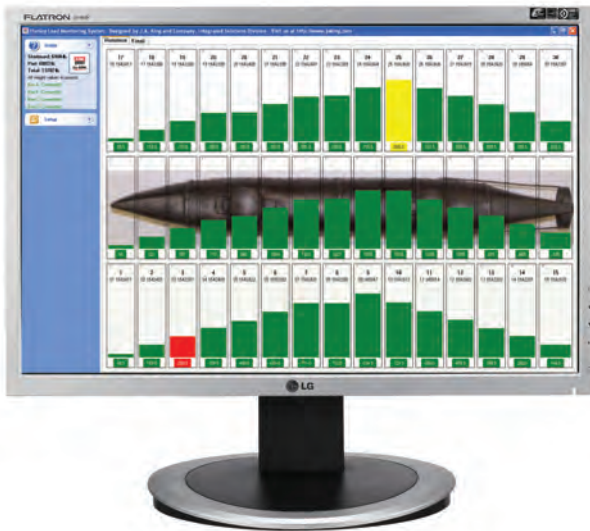

Force, Tension and Compression Testing

Custom Engineered Solutions

In 2011, J.A. King & Company engineers designed and implemented the precision load monitoring system used in the righting of the H.L. Hunley - the first combat submarine, which was sunk in 1864.

Our engineers put in place a custom 32 load cell system, complete with a custom software package used to monitor the stress placed on the submarine during the rotation process. Visit JAKing.com/news to learn more.

Application Sales & Support

We also sale and support:

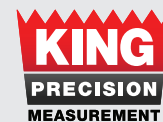

- » Strength Test Machines
- » Tensile Test Machines
- » Fabric Thickness Test Machines
- » Material Compression Machines
- » Custom Test Stands
- » Custom Load Cell Applications

Full Service Measurement Company

As one of the largest measurement providers in the region, if you have a measurement need J.A. King & Company can help you meet that need.

In addition to a complete line of force, tension, and compression testing equipment, J.A. King & Co offers a suite of measurement services and solutions:

- » Custom Engineered Systems and Integration
- » Scale Service, Calibration, and Repair
- » Quality Control and Quality Assurance
- » Parts Measurement and Parts Inspection
- » More than 150 ISO17025 Certified Measurement Parameters
- » Contract Inspection Services
