## Upcoming Open House | Friday, November 11th

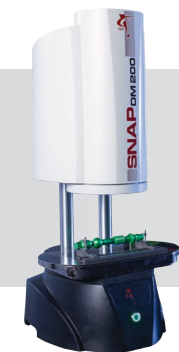

Don't miss your chance to view the latest metrology tools and technology from RAM & CCP at our upcoming open house on Friday, November 11th, from 9:00am to 4:00pm in Whitsett, NC.

To register for this open house, please contact Tim Fantauzzo, Vice President of Sales at [tim.fan@forceqvi.com](mailto:tim.fan@forceqvi.com).

**CCP Comparators** offer LED illumination, solid state edge detection and digital video cameras which have expanded their capabilities, transforming them into automated, high-tech measuring systems.

**c-vision Video Contour Projector**® combines the proven design of a profile projector with the accuracy of a video measurement system. Now available with eCAD<sup>PLUS</sup> which displays a 2D CAD drawing directly on the video monitor, allowing you to visually compare the CAD file to your part.

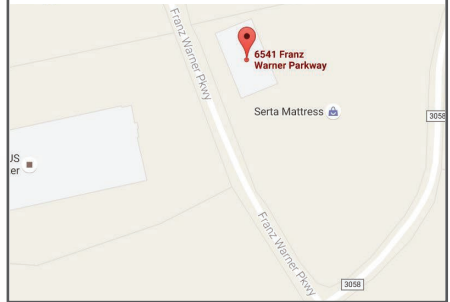

**SNAP™** systems pair large-field-of-view (LFOV) optical technology with capable metrology software to identify and automatically measure parts and features placed anywhere within the field-of-view.

**SprintMVP™ & SparkMVP** systems excel at providing quick, accurate measurements for multiple parts within minutes, presenting a snapshot of the current status of multiple processes.

### Location:

J.A. King  
6541 Franz Warner Pkwy  
Whitsett, NC 27377
