

J.A. King offers comprehensive measurement solutions that enable companies in the energy sector to maximize productivity and reduce the risk of a critical field failure. From the wellhead through distribution - we have a solution to meet your needs!

MAXIMIZE PRODUCTIVITY & REDUCE THE RISK of a critical field failure

In an increasingly competitive global environment leading edge energy companies are focused on operating efficiency and reducing fixed costs. This continues to be increasingly difficult due to the extreme environments and the technological challenges surrounding emerging energy sources. An intense focus on quality and quality systems is absolutely essential to operating efficiently while maintaining safety.

SERVICES

ISO 17025 Calibration

- One of the broadest scopes in the industry

24 Hour Technical Support & Repair

- Repair capabilities for variety of measurement equipment
- GPS Technician dispatching

Measurement & Inspection

- Contract Inspection - OEM supplier component inspection

Consulting

- Quality Systems
- Audit Prep
- Six Sigma

Embedded

- Our services available on a full-time, fully integrated basis at your facility

PRODUCTS

Distributor for over 50 major measurement brands. Our professional team will help you select the ideal product for your application, install your new equipment, and provide the necessary training.

Popular product offerings for the Energy industry include:

- Thread gages
- Snap gages
- Gage blocks
- Micrometers and calipers
- Surface plates
- Height and depth gages
- Electronics
 - Multimeters
 - Oscilloscopes
- Torque
 - Wrenches
 - Transducers
- Process instrumentation
 - Temperature
 - Pressure
- Medium to heavy capacity scales

ENGINEERING

Our engineers design, build, implement, and support best-in-class systems to help you:

- Improve productivity
- Safely and accurately handle hazardous materials
- Obtain more accurate measurements in less time
- Reduce waste
