

## J.A. King's engineering team has a solution

There are many great measurement instruments out there, but sometimes, an off-the-shelf product just doesn't give you the information you need. Or it's hard to use. Or it doesn't fit with your existing infrastructure. That's when J.A. King's engineering group can help.

With electrical, mechanical and software engineers, as well as in-house machining and assembly capabilities, J.A. King's engineering department works with you to design a solution that is specific to your application.

From the simple to the complex, our engineers can design a solution that:

- Is easy to use, even if the measurement application is complex
- Fits perfectly with your existing hardware
- Integrates seamlessly into any back office system
- Tailored to your accuracy and reporting requirements
