

## J.A. King's embedded services give you complete measurement peace of mind

J.A. King partners with many companies to provide fully integrated measurement services at their facilities. With J.A. King onsite full time, providing your measurement, calibration and repair, we put more integrity into your quality system, while driving better asset management and reducing total cost of ownership.

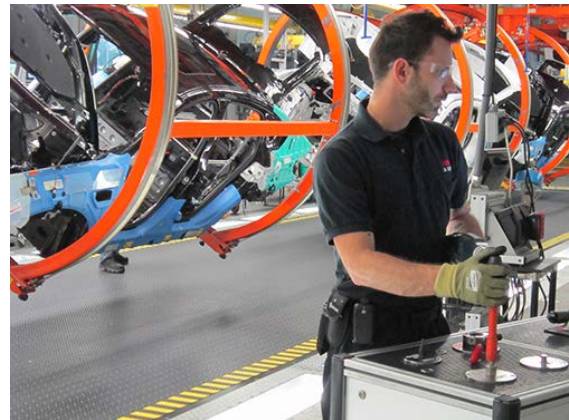

### Take A Look At The Chalk Talk About J.A. King Embedded Services

Our embedded services are completely tailored to the particular application. We accommodate companies who need one or two technicians, up to 70 J.A. King employees working throughout their facilities around the clock.

Engaging J.A. King proves that your measurements, your processes and your products, are important enough to hire world-class professionals.

Some of the tangible benefits of implementing J.A. King embedded services at your facility include:

- Full time calibration and measurement expertise, at your disposal
- ISO 17025 accredited calibration, repair and QC audit services
- Scale up or down as necessary - no recruiting, training, or legacy costs
- One simple monthly billing system
- Award winning cloud-based tracking and reporting system
