

Introducing product and environmental testing from J.A. King

At all points of the development and production process, consumer goods are required to go through rigorous testing protocols to ensure conformance to specification and safety guidelines. J.A. King is pleased to announce that we can now offer a wide range of product and environmental testing for our customers in the consumer products industry.

With the acquisition of the Millennium Group in Greenville, SC, J.A. King has added testing experts with over 80 years of experience. We are ISO 17025 accredited and specific capabilities include:

- Accelerated Aging
- Climatic Stressing
- UV & Sun Simulation
- Dimensional Testing
- Conductivity
- Impact & Drop Testing
- Viscosity/Porosity Testing
- Tensile/Compression Testing
- Thickness Testing
- Flammability Testing
- Salt Fog Testing (NaCl/Cass)
- Moisture Saturation Testing
- Packaging Testing
- Reliability/Durability Testing

We know that every test specification is unique, as is every product tested. Our test engineers work with you to design a test plan that fulfills all your requirements in the most efficient way possible. This can include the custom design of test rigs and components, when necessary.

You already know J.A. King for our world-class measurement and calibration. We now take that expertise to another level with our product testing capabilities. [Click here to schedule a consultation with our engineer to discuss your testing needs.](#)
