

## Bringing Calibration to You

J.A. King has one of the broadest ISO 17025 accredited scopes in the measurement industry, but did you know we bring our capability to you?

Equipment calibration is necessary to ensure your measuring and testing equipment is as accurate as possible, and to maintain regulatory compliance. However, sending equipment out for calibration is often a headache. If you don't have spares, productivity can be impacted while you wait for equipment to be returned.

It is also possible for equipment to be damaged during shipping. Shipping charges for large, heavy equipment can be costly, or shipping may even be impossible in some instances. Spare yourself the headache, and take advantage of [J.A. King's on site calibration services](#)! Our expert technicians come to your facility when it is convenient for you to calibrate your equipment.

No more worrying about turnaround time, shipping charges, or having spares on hand. You can now have peace of mind knowing your equipment is operating properly and in compliance without impacting productivity!
