

Instead of our usual email on serious measurement topics, we thought we'd have a little fun for the December version. So we persuaded some of our technicians from around the company to help us sing "The Twelve Days of Calibration."

Remember, we're precision measurement professionals, not professional singers, so please keep your volume low! Take a look at the lyrics below in case you want to follow along at your desk!

## "The Twelve Days of Calibration- J.A. King"

On the twelfth calibration J.A. King did for me:

- Twelve pneumatic torque tools
- Eleven pressure gages
- Ten sets of gage blocks
- Nine hi-pot testers
- Eight multimeters
- Seven data loggers
- Six thermocouples
- Five class one weights
- Four rental scales
- Three pipettes
- Two refrigerators
- and the surface plate in QC

**Happy Holidays**  
**From John, Tory, Rachel, Doug, &**  
**Everyone at J.A. King!**

p.s. Don't forget if there are budget items that you need to purchase before fiscal 2016

comes to a close, we've got some great promos running through the end of the year. These include:

- [Arium Mini High Purity Water Systems](#) (free consumables)
- [Lab Combo: Buy a Balance and receive a free pH Meter](#)
- [Purchase a pH Meter and receive a free Electrode](#)
- [Upgrade or replace your pipettes, up to 35% discount](#)
