# J.A. KING

PRECISION MEASUREMENT PROFESSIONALS

Our GageSuite calibration software is FREE and ideal for audits.

With the first post-FSMA FDA audits starting to roll out, companies are seeing an even great emphasis on documentation. It's not simply enough to have preventative controls in place. You have to be able to prove they are working correctly and have the records to back it up.

J.A. King's award winning software, GageSuite, can help. It is **FREE** to all of our customers and cloud-based, so you can access it on any device with an internet connection. Once you log in, you're taken to your company's equipment list, with every piece of equipment calibrated by J.A. King. One more click pulls up the latest certificate. In fact, every cert that J.A. King has ever created for you will be there, so no need to worry about tricky audit questions!

GageSuite also features four levels of editable location fields, so you can assign and change location information as needed. The software also has automatic recall notices, so you'll receive email notifications 3 months, 2 months and 1 month before the equipment is due for calibration.

To watch a short demo of J.A. King's GageSuite, take a look at the video the the right!
