## Proper validation of equipment and processes require the right measurement device. Do you have what it takes?

J.A. King has partnered with MadgeTech to provide high quality data loggers for pressure, temperature, and humidity. Whether you are validating Autoclaves, monitoring Liquid Nitrogen Tanks & Lyophilizers, or Supply Chain Warehouses, J.A. King can provide the right tool for the job.

Through MadgeTech, J.A. King can provide fully submersible options like the PR140/HiTemp140, Intrinsically safe Temp/RH units, and wireless systems that provide instant access to storage conditions from anywhere. Monitoring cold sensitive shipments? We have that covered too!

Data loggers are available to monitor:

- Temperature
- Humidity
- Pressure
- Pulse / Event / State
- Current / Voltage
- Shock / Vibration
- Bridge / Strain
- Carbon Dioxide

Click the button below to have J.A. King help you identify the right tool for your application.
