

Ensure your centrifuge is humming at the proper speed and temperature with J.A. King laboratory services

Did you know J.A. King can perform calibration service on your GxP laboratory centrifuges? In addition to several other laboratory equipment calibration disciplines such as pipettes, lab balances, and pH meters, centrifuge calibration can be performed at several of the laboratories throughout our network.

J.A. King can help you maintain compliance, saving you time and money by keeping your centrifuges humming at the proper speed, temperature, and completing assays on time. Our technicians can perform calibrations of multiple parameters such as speed, temperature, and time, leaving you with confidence that your separations will be effective every time. [Learn more](#) about centrifuge calibration with J.A. King.

In addition to centrifuge calibration, if you are in need of a new centrifuge, we can assist with the selection of the right equipment to suit your needs. Click below for a quote on centrifuge calibration service or pricing on new centrifuges.
