

J.A. King Embedded Services

J.A. King partners with numerous companies to provide fully integrated services at their facilities. With J.A. King onsite full time, providing your calibration and measurement, we put more integrity into your quality system, while driving better asset management, and reducing total cost of ownership.

Our embedded services are scalable to your company. We accommodate companies with needs of one or two technicians, up to 70 J.A. King employees working throughout their facilities around the clock. Engaging J.A. King draws a line on the plant floor that your measurements, your processes, and your products, are important enough to hire world class professionals.

Many of our customers, including ones the automotive industry, have realized significant cost savings as a result of implementing [J.A. King Embedded Services](#), and you can too.

Some of the tangible benefits of implementing J.A. King embedded services at your facility include:

- Full time calibration and measurement expertise, at your disposal
- ISO 17025 accredited calibration, repair and QC audit services, full time
- Scale up or down as necessary; no recruiting, training, or legacy costs
- One simple monthly billing system
- Award winning cloud-based tracking and reporting system
