

# J.A. King Heavy Capacity

Since 1939, J.A. King has been an innovative leader in weight and scale calibration services. With **over 75 years of experience in the industry** and a **network of ISO 17025 accredited calibration laboratories** throughout the Southeast and Midwest, you can feel confident in trusting us with your heavy capacity scale.

## WHY PARTNER WITH J.A. KING?

J.A. King has a fleet of high capacity test trucks with up to 20,000 pounds of certified weight as well as certified weight carts, allowing our technicians to calibrate heavy capacity scales to meet your state's legal for trade requirements.

Our ability to serve as a **single-source provider** for all of your metrology needs, sets us apart from the competition.

**Service:** Our team of highly trained technicians will not only ensure that your scale is calibrated, but can also repair and maintain your scale as needed. We are **available 24/7** for emergency service to **minimize downtime**.

**Products:** We offer heavy capacity scales from the manufacturers you trust, and stand behind our products with **world-class post-sale service & support**.

**Engineering:** Our in-house engineering team can provide **completely customized** and integrated truck and rail scale systems. This includes fully automated systems that can cut costs, improve efficiency, and prevent fraud.

## How can we help you?
